

Wi-Fi SMART RELAY

User Guide

Control From Anywhere

This user manual will help you set up EACHEN smart devices.

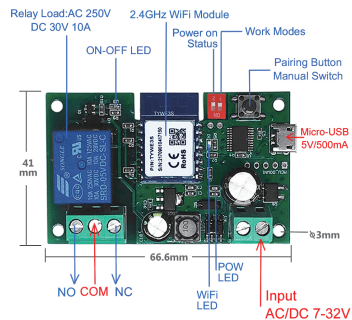

Checklist before using the device:

- Your USB power adapter should be more than 500mA output.
- Your smart phone or tablet should have connected a 2.4G WiFi with internet.
- The device only supports 2.4G Wi-Fi. If you use a 5G router (it provides two Wi-Fi signals:5G and 2.4G),please select the 2.4G WiFi to connect your smart phone.
- Download and install the Tuya Smart APP or Smart Life APP from APP Store or Google Play store. Register and log in.
- During pairing process, make sure that your IOS or Android device and the device are within the range of your WiFi router.
- Make sure your router is MAC- open. If not, please cancel the router's MAC filtering setting first.

* Install the "Tuya Smart" APP or "Smart Life" APP.

Specifications

Switch function

Work modes switch and power on status setting.

- 1=ON=Inching
- 1≠ON=Selflock
- 2=ON=Power up=ON
- 2≠ON=Power up=OFF

Inching: The relay activated for 0.7s.

Selflock: The relay activated normally ON/OFF.

Power on status: Once the device is powered up, if the relay activated or not.

Add Device

- 1 Power up the device by micro-usb or 7-32V terminal.
Note: The power input is only for the device, the relay is without voltage output.
- 2 Keep pressing the pairing button (for 5 seconds) until led indicator fast blinks.
- 3 Launch the APP . Tap the icon + on the top right to add a device. Then select Electrician→Socket(Wi-Fi), confirm the indicator LED rapidly blinks.
- 4 Select the 2.4G Wi-Fi as the one your mobile device connects with. Input correct passwords. Then, tap Next.
- 5 It will auto-connect with the device. The process will take 1 minute. Once the process is complete, it will prompt you that you can rename the device. Enter a new name and Save.

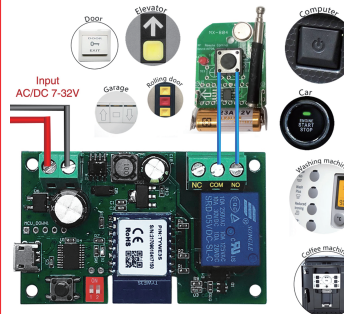

If you fail to add it during the process, it will prompt you the FAQ. Please read carefully and retry accordingly.

How to use?

Inching mode(1=ON)

Once you press the manual switch or control from the app, the relay will activate for 0.7 second, then release automatically.

You can use it to control the gate/door opener/elevator/computer/remote controller key/any momentary buttons.

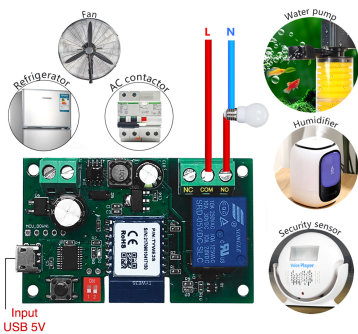

成品: 双面彩印 50*90mm 250g铜版纸 5折页 风琴折

Selflock mode(1≠ON)

Once you press the manual switch or control from the app, the relay will activate to keep ON or OFF normally.

You can use it to control the light/fan/humidifier or other home appliances.
